Hydraulic Stack Car Parking System

Stack Parking is the economical and simple parking solution for new Buildings or existing Societies where Parking can be doubled. This is a Two Level Parking system; where one car is parked on the ground level and one on the first level. The car on the ground level will need to be moved out before parking / removing the car on the raised platform.

2 Level Stack Car Parking (G+1)

SPECIFICATIONS

- Lifting Capacity: 2500 kg
- Lifting height: 2100mm
- Platform Length: 4500mm~5000mm
- Platform Width: 2500mm
- Drive Mode: Hydraulic (Single Powerpack or Common Powerpack)

Pit Level Stack Car Parking

SPECIFICATIONS

- Lifting Capacity: 5000 kg
- Lifting height: 4200mm
- Platform Length: 4500mm~5000mm
- Platform Width: 2500mm

3 Level Stack Car Parking (G+2)

Multilevel Car Parking System

Multi level Automated Car Parking Systems are much in vogue - a method of automatically parking and retrieving cars that typically use a system of pallets and lifts and signalling devices for retrieval. They serve advantages like safety, saving of space, time and fuel

CAR LIFT

- The Car lift Parking System allows parking more cars in limited medium- and large-sized parking spaces.
- One or two lifts can cover multiple-levels of parking lots.

HOME LIFT

- Home lift is a type of vertical transport equipment that efficiently moves people or goods between floors (levels, decks) of a building, or other structure.

SCISSOR LIFT

- Hydraulic Scissor Car Lifts that is ideal for lifting cars from one floor to the other.
